Current DRMS Environmental Challenges

- Increased HW disposal costs
 - Transportation costs vs multi-option years
 - HIN structure breaking down - REAs up
- Increased undocumented HM shipments to DRMO
 - Radioactive, HM & AEDA
- OCONUS HW Tracking
 - Unchanged since 1984
 - Consolidating in Battle Creek
 - No complete cradle-to-grave tracking
 - No disposal verification

Current DRMS

Environmental Challenges

(cont.)

- Contingency Operations
 - HW Identification
 - PPE, training for opening/recontainerizing drums
 - “Russian doll” containerization
 - Inventory and compatibility storage
 - Recruiting quality EE personnel (CONUS impact)
 - Little/no automation
 - Maintaining knowledge/expertise with rotations
- DOD Stakeholder Concerns
 - Your Input here

DRMS Environmental - Potential Solutions

- New disposal profile/HIN structure
- Complete revamp of OCONUS Tracking
- Hazardous Automation Training
- Active recruiting for EPS EE Positions
- Revamp PPE/training requirements for EE positions
- Standing up EMS in Contingency
- Additional Solutions Here

Workshop Goals - This Week and Beyond

- Create Process Action Teams
- Define/prioritize challenges
- Identify potential solutions
- Recommend action(s)
- Implement solution(s)
- Track progress
- Evaluate success
- Rinse & Repeat
